- **Desiccant, buffer, alcohol swab**
- **Sterile lancet**
- **Disposable capillary**
- **Package insert/procedure guide**

The COVID-19 Pandemic

COVID-19 (Corona Virus Disease) is the infectious disease caused by the most recently discovered coronavirus. This new virus and disease were unknown before the outbreak began in Wuhan, China, in December 2019.

The most common symptoms of COVID-19 are fever, tiredness, and dry cough. Some patients may have aches and pains, nasal congestion, runny nose, sore throat or diarrhea. Elderly, and those with underlying medical problems like high blood pressure, heart problems or diabetes, are more likely to develop serious illness.

Easy To Use Procedure

Note: Test can also be run with serum/plasma specimens
